COMPANY PROFILE
FUTURE OF ENERGY

Our Global Services

We at OREX supply unique and reliable, high quality solar energy products and services which include all of the stages involved in manufacturing, quality assurance and supplying. OREX was formed in 2011 identifying your needs and provide you with efficient low cost solar energy systems. We are confident that by using our solar energy systems you will begin saving money, time and energy from the beginning. One of the leading companies specialized in supplying solar energy products to more than 40 countries around the world.

We are the agents of international companies such as Longi Solar, Jinko Solar, Trina Solar, Felicity Battery and Su-kam Battery. Our distribution center is in Jebel Ali free zone, Dubai, United Arab Emirates.

Mission

Our mission is providing our clients with the latest solar products with reliable, and cost-effective and technologies delivered with the best technical support and customer service. Through our dedication to excellence and sustainability, we aim to contribute to a cleaner, greener future for generations to come.

Vision

Our vision is to be the leading well-known and reputed organization providing the highest quality solar systems and solutions in the market. We envision a world where clean, renewable energy is accessible to all, and reducing carbon emissions.

Why OREX?

When it comes to the vast, clean and renewable energy future, the importance of solar energy comes second to none. Thanks to advancements in technologies, that made it possible to create reliable solar energy resources to significantly meet the annual energy needs of the people across the world.

We, at OREX, offer top-notch solar solutions for industrial, residential and commercial use for our partners around the world. Established in 2011, the company has successfully expanded its operations to meet different solar energy needs of industries and has become one of the most trusted solar suppliers in China, the Middle East and Africa. Our solar powered products include solar panel and inverter, UPS charge controller, inverter solar cell, solar batteries, and PV powered inverter and so on.

Bright Savings, Bright Future

Scope of Work

Every year, as we send out these containers to destinations worldwide, we're not just exporting products; we're exporting a vision. Our solar panels are deployed in diverse settings, from residential rooftops to commercial installations and large-scale solar farms, powering homes, businesses, and communities with clean, sustainable energy.

Order Handling

We receive order through our customer interface channels, and the orders consolidated into a back-end Omni-channel. The order is registered into our back office systems. We notify the customer that the order has been received.

Manufacturing & Production

We manufacture the equipment from 100% quality assured subjects with pure raw materials, then assembling and forming equipment using the most modern technologies available in our manufacture.

Testing & QA

We ensure the equipment perform as expected in its corresponding sheet under standard testing condition available in our manufacture with the approved quality standards.

Shipment & Logistics

We take the responsibility of all the physical and documentation steps, which must take place in the shipping process for every single shipment moving from OREX to consignee in international trade.

OREX Products

The list of OREX products is a variety of solar products used in residential, commercial, and industrial applications.

Solar Panel

When you evaluate the types of solar panels for your PV (Photovoltaic) system, you will end up finding their two types- polycrystalline solar panels (**poly**) and monocrystalline solar panels (**mono**). Due to their appearance, efficiency, high power output, long life span and performance, these solar panels are gaining lion's share of attention for residential as well as commercial purposes.

OREX is a leading wholesale distributor of top-quality solar panels that not only benefit you in the long run but will prove to be a smart decision. You can browse and select the best suitable solar panel either polycrystalline solar panels (poly) or mono solar panels (mono) out of wide categories available at OREX and leverage their ultimate performance and energy efficiency.

Solar Batteries

Today, solar batteries are highly demanding product in the market due to their long battery life and reliability as compared to normal flat plate batteries. These solar batteries offer a significant economic benefit for residential and commercial solar installations and allow people to be less dependent on the additional power through grids.

OREX offers a variety of solar batteries including AGM batteries and tall tubular batteries with an ongoing research to produce Lithium batteries, that greatly support solar-powered devices. All our products are made up of high-grade material and meet all the set standards for electrical parameters including, capacity, Ah/Wh efficiency, internal resistance value and SOC voltage per cell. You can choose the batteries that suit the best to support your solar requirements.

Solar Inverters

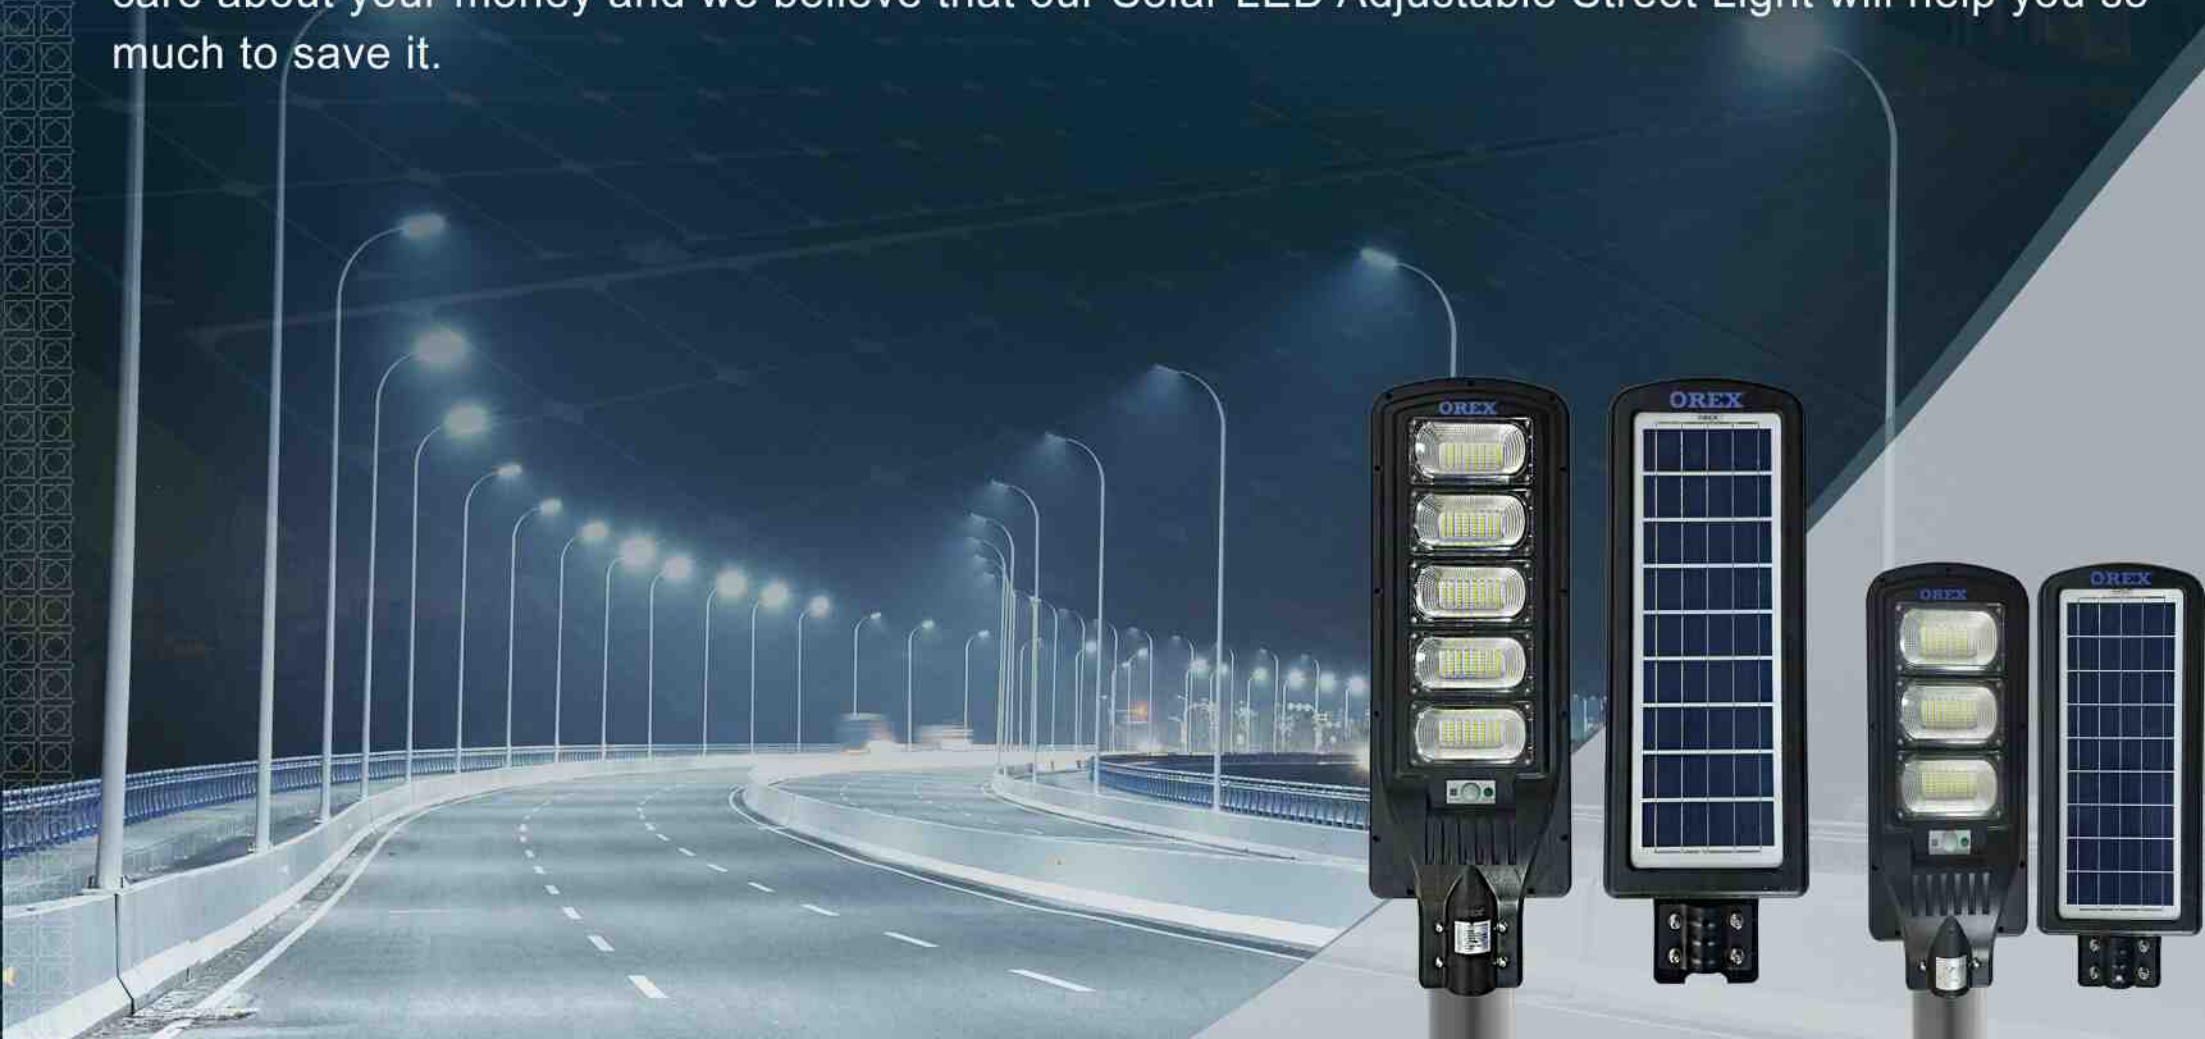

A solar inverter is considered as the heart of your solar PV system as it changes the variable direct current of the solar panels into the alternating current. It is the most reliable solar appliance that works great at residential and industrial premises while reducing the impact of global warming and greenhouse gases. Also, they are cost-effective as compared to traditional generators.

Being a leading wholesale distributor of solar inverters, OREX ensures that all the products are of top-quality, highly durable and are great energy-efficient. We offer world-class solar inverters which include, but not limited to Modify Sin Wave Inverter, Solar Water Pump Inverters, Hybrid Inverter with MPPT, High capacity Inverters and Solar Home UPS. With a wide variety available in our OREX solar inverters, we can help you to choose the one that matches your requirements.

Solar Street Lights

OREX has a wide range of Solar LED Street Light from 200W to 300W, which support different installation requirement as per the place. Design by the Aluminum, with the new powerful LiFePo4 Battery, whether proof Design, Auto On/Off and Luxury Design which support the Rotating so you can move it where you need in your garden, Parking Lot.. With OREX Solar LED Street Light we care about your money and we believe that our Solar LED Adjustable Street Light will help you so much to save it.

OREX Solutions

Solar on-grid system

Solar on-grid solutions are systems that directly connect to the existing electrical grid infrastructure, allowing users to generate solar power and feed it back into the grid.

Solar off-grid system

Solar on-grid solutions are systems that directly connect to the existing electrical grid infrastructure, allowing users to generate solar power and feed it back into the grid.

OREX Solutions

Solar Street Lighting System

The most economic and environmentally friendly solutions that can enhance visibility and improve security for your designated project. Without the need for excessive underground wiring, connections or hardware.

Solar water Pumping System

The advantages of these systems include:

- Solar pumps operate anywhere the sun shines
- Require minimal service and maintenance
- Virtually free to operate, compared to the cost of diesel-powered generators and grid electricity which is constantly increasing

Our Global Reach

At OREX, our commitment to sustainability knows no borders. With a steadfast dedication to providing innovative solar solutions, we have established a robust global reach that spans continents, connecting us with customers, partners, and communities worldwide.

Our Brand Partners

In our pursuit of providing comprehensive solar solutions, we have collaborated with leading brands renowned for their expertise and reliability in solar battery technology and panel manufacturing. These partnerships enable us to offer a diverse range of cutting-edge products that meet the evolving needs and preferences of our customers.

Our brand partners are industry pioneers, recognized for their commitment to sustainability, performance, and durability. Through these collaborations, we leverage the latest advancements in solar technology to deliver solutions that maximize energy efficiency, reliability, and longevity.
